

# SafeLandUSA

## What is SLUSA?

SafeLandUSA (SLUSA) Orientation has been developed for the US Onshore E&P industry by volunteers from major and independent operating companies, industry associations and educators which forms the SLUSA Advisory Group. The purpose of the orientation is to set high minimum requirements for a widely accepted E&P Health, Safety and Environmental orientation and induction.

## Benefits

- Orientation designed specifically for our industry
- Consistent EH&S orientation recognized by multiple operators
- Better qualified and competent employees
- Cost savings due to less re-training of employees
- Orientation remains with employee throughout career
- Quality assurance through an audit program and oversight committee
